PART 1 – INSTRUCTIONS TO PROPOSERS AND PROPOSAL CONDITIONS

1.1. About IUCN
IUCN is a membership Union uniquely composed of both government and civil society organisations. It provides public, private and non-governmental organisations with the knowledge and tools that enable human progress, economic development and nature conservation to take place together.

Headquartered in Switzerland, IUCN Secretariat comprises around 950 staff in more than 50 countries.

Created in 1948, IUCN is now the world’s largest and most diverse environmental network, harnessing the knowledge, resources and reach of more than 1,300 Member organisations and some 15,000 experts. It is a leading provider of conservation data, assessments and analysis. Its broad membership enables IUCN to fill the role of incubator and trusted repository of best practices, tools and international standards.

IUCN provides a neutral space in which diverse stakeholders including governments, NGOs, scientists, businesses, local communities, indigenous peoples organisations and others can work together to forge and implement solutions to environmental challenges and achieve sustainable development.

Working with many partners and supporters, IUCN implements a large and diverse portfolio of conservation projects worldwide. Combining the latest science with the traditional knowledge of local communities, these projects work to reverse habitat loss, restore ecosystems and improve people’s well-being.

**PART 2 – THE REQUIREMENT**

**Background information**

Climate change is increasing the frequency, intensity and magnitude of disasters, leading to a higher number of casualties as well as property and economic losses. Nature can provide cost-effective, no-regret solutions, which help increase community resilience beyond their capacity to absorb and recover from a single disaster, such as a flood or drought. The Western Balkan economies are among the most vulnerable with respect to climate change impacts affecting numerous sectors and domains. Yet, the value derived from employing Nature-based Solutions in response to societal challenges remains underexplored and the application of approaches that integrate natural infrastructure remain insufficient and fragmented. Beyond the positive impact on societies and improved management of disaster risks, Nature-based Solutions benefit habitats and biodiversity as well as support climate change mitigation and adaptation.

ADAPT: Nature-based Solutions for resilient communities in the Western Balkans is a project funded by the Swedish International Development Cooperation Agency (Sida) and implemented by IUCN. It aims to increase ecosystem and community resilience to climate change and environmental degradation in the Western Balkans. This regional umbrella initiative works with the six Western Balkan economies, regional and local partners.

The project will be implemented through the following three strategies:

1. Increasing the knowledge and awareness of nature-based disaster risk reduction solutions among decision makers, natural resource managers and local communities;

2. Integration of Nature-based Solutions and equitable climate-smart planning into adaptation and disaster reduction policy; and

In North Macedonia, the focus of activities will be on knowledge generation and awareness raising, planning and policy as well as the development of a comprehensive tender dossier for a Nature-based Solutions projects, including their potential for scale-up. The main focus of climate change interventions has been on mitigation rather than adaptation. Activities for disaster risk reduction focus primarily on early warning systems and a crisis management system. The fact that ecosystem-based adaptation approaches have not yet been included in these systems, calls for a strengthened knowledge base on climate change, ecosystem management and biodiversity linkages, capacity building on the application of Nature-based Solutions for climate change adaptation and disaster risk reduction as well as the integration of Nature-based Solution principles into climate change policies and strategies.

The project works at multiple levels and involves government agencies, research institutions and civil society, which offers opportunities for knowledge exchange, wider capacity building and institutional strengthening as well as the potential for scaling up. The main institutional partners in North Macedonia are the Ministry of Environment and Physical Planning and the Crisis Management Center.
Scope of work

The objective of this assignment is to support ADAPT activities in North Macedonia, where a Nature-based Solution pilot project tender dossier is going to be developed. Therefore, the services of a local expert are required. The assignment will be divided into five parts: 1) compilation of information on existing initiatives, projects, activities, organisations and key experts in/or involving North Macedonia currently applying Nature-based Solutions and preparation of best practice cases, 2) preparation of background information for a national scoping study, 3) liaison with local authorities and stakeholders, 4) preparation of a list of national and local communication channels and participation in a one-day consultation workshop on the project communications strategy and 5) organisation of field visits, consultations, events and preparation of meeting reports.

Specific tasks

The consultant will be responsible for the following tasks:

1. Best practice cases
   - Compile a list of ongoing Nature-based Solutions initiatives from/involving North Macedonia.
   - Prepare 3-5 best practice cases highlighting key outcomes of the initiative, costs and benefits of employing Nature-based Solutions and lessons learned for inclusion in a compendium of good practices and knowledge platforms (e.g. PANORAMA). The case studies should follow the format and guidance provided by PANORAMA on how to prepare case studies. Additional guidance on this task will be provided by IUCN ECARO.

2. National scoping study
   - Assist in the development of a national scoping study for North Macedonia. The national scoping study will provide an overview of the situation in North Macedonia, identify priorities and needs for intervention. It serves as background for the planned pilot tender dossier as well as the identification of key national climate change threats, disaster risks, most vulnerable sites and potential for the application of Nature-based Solutions producing a list of additional pilot sites. The scoping study will also analyse the cost-effectiveness of Nature-based Solutions in comparison to conventional solutions/interventions and consider socio-economic and gender aspects.
   - Organise consultation meetings with stakeholders on the national scoping study and prepare their feedback and inputs for inclusion in the study.

3. A tender dossier for North Macedonia
   - The tender dossier for a Nature-based Solutions pilot project will be based on the results of the scoping study, related vulnerability assessments and consultations with national partners and local communities and a field visit.
   - Prepare a stakeholder analysis of key actors to be consulted in support of the development of the tender dossier.
   - Organise field visits of the project team and external consultants.
   - Organise consultation meetings and facilitate meetings of the project team and external consultants with local authorities and other key stakeholders.

4. Communication and dissemination
   - Prepare a list of channels for dissemination and communication of project results as well as opportunities for awareness raising at local and national level in accordance with the project’s communications strategy.
   - Participate in a one-day consultation for the development of a communications strategy.
• Prepare a list of national policies, strategies and programmes and assess opportunities for integration of Nature-based Solutions principles into these policies, including alignment with European Union policies and laws.

5. Logistical support
• Participate in the project launch and closing events and 6 national Nature-based Solutions Coordination Group meetings.
• Present key results and updates of activities in North Macedonia at national events.
• Organise, provide logistical support and prepare meeting reports for meetings, consultations, events, field visits, capacity building events etc. held in North Macedonia. A detailed schedule of events will be provided by IUCN ECARO together with relevant deadlines included in the updated project work plan.
