#### 4. COMPLETING AND SUBMITTING A PROPOSAL

- 4.1. Your Proposal must consist of the following four separate documents:

- Signed Declaration of Undertaking (see Attachment 2)
- Pre-Qualification Information (see Section 4.3 below)
- Technical Proposal (see Section 4.4 below)
- Financial Proposal (see Section 4.5 below)

Proposals must be prepared in English.

- 4.2. Your Proposal must be submitted by email to the IUCN Contact (see Section 2). The subject heading of the email shall be [RfP Reference – bidder name]. The bidder name is the name of the company/organisation on whose behalf you are submitting the proposal, or your own surname if you are bidding as a self-employed consultant. Your proposal must be submitted in PDF format. You may submit multiple emails suitably annotated, e.g. Email 1 of 3, if attached files are too large to suit a single email transmission. You may not submit your Proposal by uploading it to a file-sharing tool.

**IMPORTANT:** Submitted documents must be password-protected so that they cannot be opened and read before the submission deadline. Please use the same password for all submitted documents. After the deadline has passed and within 12 hours, please send the password to the IUCN Contact. This will ensure a secure bid submission and opening process. Please DO NOT email the password before the deadline for Proposal submission.

- 4.3. *Pre-Qualification Criteria*

IUCN will use the following Pre-Qualification Criteria to determine whether you have the capacity to provide the required goods and/or services to IUCN. Please provide the necessary information in a single, separate document.

Pre-Qualification Criteria	
1	3 relevant references of clients similar to IUCN / similar work
2	Confirm that you have all the necessary legal registrations to perform the work
3	State your annual turnover for each of the past 3 years
4	How many employees does your organisation have who are qualified for this work?

- 4.4. *Technical Proposal*

The technical proposal must address each of the criteria stated below explicitly and separately, quoting the relevant criteria reference number (left-hand column).

Proposals in any other format will significantly increase the time it takes to evaluate, and such Proposals may therefore be rejected at IUCN's discretion.

Where CVs are requested, these must be of the individuals who will actually carry out the work specified. The individuals you put forward may only be substituted with IUCN's approval.

IUCN will evaluate technical proposals with regards to each of the following criteria and their relative importance:

	Description	Information to provide	Relative weight
1	Relevant expertise of the consultant, demonstrated by past work	Similar or complementary publications or projects	20%

2	Technical proposal shows clear understanding of the objectives of the assignment	Additional information responding to the ToRs sections	25%
3	Approaches suggested in the technical proposal are well-defined, relevant and correspond to the assignment of the TORs	Conceptual framework	25%
4	Approaches suggested in the technical proposal, including work plan, are feasible and provide clear path for successful, on-time, on-budget completion of the work	Work plan	25%
5	Demonstrated excellent communication ability, and ability to work under tight timelines and manage and resolve issues and problems as they arise	CVs of team members	5%
TOTAL			100%

#### 4.5. *Financial Proposal*

4.5.1. The financial proposal must be a fixed and firm price for the provision of the goods/services stated in the RfP in their entirety.

##### 4.5.2. *Prices include all costs*

Submitted rates and prices are deemed to include all costs, insurances, taxes (except VAT, see below), fees, expenses, liabilities, obligations, risk and other things necessary for the performance of the Terms of Reference or Specification of Requirements. IUCN will not accept charges beyond those clearly stated in the Financial Proposal. This includes applicable withholding taxes and similar. It is your responsibility to determine whether such taxes apply to your organisation and to include them in your financial offer.

##### 4.5.3. *Applicable Goods and Services Taxes*

Proposal rates and prices shall be exclusive of Value Added Tax.

##### 4.5.4. *Currency of proposed rates and prices*

All rates and prices submitted by Proposers shall be in Euros.

##### 4.5.5. *Breakdown of rates and prices*

For information only, the price needs to be broken down as follows:

	Description	Quantity	Unit Price	Total Price
1	Daily rates			
2	Cost per page (for design and layout)			
	TOTAL			

4.6. Additional information not requested by IUCN should not be included in your Proposal and will not be taken into account in the evaluation.

4.7. Your proposal must remain valid and capable of acceptance by IUCN for a period of 90 calendar days following the submission deadline.

#### 4.8. *Withdrawals and Changes*

You may freely withdraw or change your proposal at any time prior to the submission deadline by written notice to the IUCN Contact. However, in order to reduce the risk of fraud, no changes or withdrawals will be accepted after the submission deadline.

## 5. EVALUATION OF PROPOSALS

### 5.1. *Completeness*

IUCN will firstly check your proposal for completeness. Incomplete proposals will not be considered further.

### 5.2. *Pre-Qualification Criteria*

Only proposals that meet all of the pre-qualification criteria will be evaluated.

### 5.3. *Technical Evaluation*

#### 5.3.1. *Scoring Method*

Your proposal will be assigned a score from 0 to 10 for each of the technical evaluation criteria, such that '0' is low and '10' is high.

#### 5.3.2. *Minimum Quality Thresholds*

Proposals that receive a score of '0' for any of the criteria will not be considered further.

#### 5.3.3. *Technical Score*

Your score for each technical evaluation criterion will be multiplied with the respective relative weight (see Section 4.4) and these weighted scores added together to give your proposal's overall technical score.

### 5.4. *Financial Evaluation and Financial Scores*

The financial evaluation will be based upon the full total price you submit. Your financial proposal will receive a score calculated by dividing the lowest financial proposal that has passed the minimum quality thresholds (see Section 5.3.2) by the total price of your financial proposal.

Thus, for example, if your financial proposal is for a total of CHF 100 and the lowest financial proposal is CHF 80, you will receive a financial score of  $80/100 = 80\%$

### 5.5. *Total Score*

Your proposal's total score will be calculated as the weighted sum of your technical score and your financial score.

The relative weights will be:

**Technical: 70%**

**Financial: 30%**

Thus, for example, if your technical score is 83% and your financial score is 77%, you will receive a total score of  $83 * 70\% + 77 * 30\% = 58.1\% + 23.1\% = 81.2\%$ .

Subject to the requirements in Sections 4 and 7, IUCN will award the contract to the bidder whose proposal achieves the highest total score.

## 6. EXPLANATION OF PROCUREMENT PROCEDURE

6.1. IUCN is using the Open Procedure for this procurement. This means that the contracting opportunity is published on IUCN's website and open to all interested parties to take part, subject to the conditions in Section 7 below.

6.2. You are welcome to ask questions or seek clarification regarding this procurement. Please email the IUCN Contact (see Section 2), taking note of the deadline for submission of questions in Section 3.1.

- 6.3. All proposals must be received by the submission deadline in Section 3.2 above. Late proposals will not be considered. All proposals received by the submission deadline will be evaluated by a team of three or more evaluators in accordance with the evaluation criteria stated in this RfP. No other criteria will be used to evaluate proposals. The contract will be awarded to the bidder whose proposal received the highest Total Score. IUCN does, however, reserve the right to cancel the procurement and not award a contract at all.
- 6.4. IUCN will contact the bidder with the highest-scoring proposal to finalise the contract. We will contact unsuccessful bidders after the contract has been awarded and provide detailed feedback. The timetable in Section 3.1 gives an estimate of when we expect to have completed the contract award, but this date may change depending on how long the evaluation of proposals takes.

In case of joint venture, one company shall not be allowed to participate in two different joint ventures in the same procurement nor shall a company be allowed to submit a proposal both on its behalf and as part of a joint venture for the same procurement. A bidder who submits or participates in more than one proposal (other than as a subcontractor or in cases of alternatives that have been permitted or requested) shall cause all the proposals with the bidder's participation to be disqualified.

## **11. ABOUT IUCN**

IUCN is a membership Union uniquely composed of both government and civil society organisations. It provides public, private and non-governmental organisations with the knowledge and tools that enable human progress, economic development and nature conservation to take place together.

Headquartered in Switzerland, IUCN Secretariat comprises around 1,000 staff with offices in more than 50 countries.

Created in 1948, IUCN is now the world's largest and most diverse environmental network, harnessing the knowledge, resources and reach of more than 1,300 Member organisations and some 10,000 experts. It is a leading provider of conservation data, assessments and analysis. Its broad membership enables IUCN to fill the role of incubator and trusted repository of best practices, tools and international standards.

IUCN provides a neutral space in which diverse stakeholders including governments, NGOs, scientists, businesses, local communities, indigenous peoples organisations and others can work together to forge and implement solutions to environmental challenges and achieve sustainable development.

Working with many partners and supporters, IUCN implements a large and diverse portfolio of conservation projects worldwide. Combining the latest science with the traditional knowledge of local communities, these projects work to reverse habitat loss, restore ecosystems and improve people's well-being.

### **Terms of Reference** **International consultancy for the development of Operational Guidelines on NbS for corporate net-zero targets**

#### **Background**

IUCN is wholly committed to accelerating a just and equitable transition to a low carbon future, for the protection of people and the planet. Accelerating climate action requires a global transition to clean and renewable energy sources, along with a suite of climate mitigation actions including eliminating the use of coal for energy, reducing fossil fuel consumption, decarbonizing heavy and light industries, transforming agriculture and food systems, halting deforestation, and restoring ecosystems which can absorb and store carbon. Collectively, these actions offer a window of opportunity to not only address climate change, but improve social, environmental, and economic outcomes for all.

Nature-based Solutions – based on the protection, restoration and sustainable management of the world’s ecosystems – are a critical tool for climate action. NbS could contribute around 30% of the global mitigation required by 2030/2050 to achieve the 1.5/2°C temperature rise goal agreed to under the Paris Agreement (Griscom et al 2017, Roe et al 2019). Note that this contribution translates into emission reductions and removals, within and beyond the supply chain.

While nature provides critical solutions to the climate crisis, NbS alone cannot close the gap between global carbon emissions and climate targets. The remaining 70% of global mitigation is still required. Furthermore, continued global warming may limit the potential of nature for climate mitigation and adaptation. NbS must be implemented together with rapid and aggressive decarbonization of all sectors and cannot be a substitute that allows countries and corporations to continue with business-as-usual emissions.

Nature-based solutions translate into many different actions across productive sectors as part of their decarbonization strategies. In addition to these actions geared toward reducing emissions within sectors’ supply chains, NbS can also generate carbon sequestration beyond companies’ supply chains, where these mitigation outcomes could be used to neutralize residual emissions in line with the principles and guidance for science-based corporate net-zero targets.

As political recognition and uptake of NbS continue to grow, there is a need to implement NbS by responding to robust standards and stringent criteria and guidelines to ensure that the use of NbS in net-zero strategies is appropriate, impactful and well-planned.

Based on the mandate from [WCC 2020 Res 114](#) and [WCC 2020 Res 60](#) and building from a [global survey](#) carried out in 2021 across IUCN’s [membership and constituency](#), IUCN Secretariat is seeking to develop guidelines on the use and implementation of NbS in the context of corporate net-zero targets.

#### **Objectives**

1. To prepare guidelines for companies in different sectors that are interested in (i) uptaking NbS best practices to contribute to their net-zero targets (within and beyond the supply chain) and, as a result, develop solid plans aligned with NbS definition and standards, as well as (ii) receiving direction on quantifying contributions of their implemented NbS in addition to carbon. These guidelines will:
  - 1.1. Examine the latest literature and evidence on the use of NbS to achieve net-zero by the corporate sector;
  - 1.2. Generate realistic scenarios and options for the responsible application of NbS in net-zero pathways, building practical guidance.
  - 1.3. Incorporate in the guidance best practice to report NbS implementation for net-zero as well as reporting on benefits beyond carbon (biodiversity, communities, etc),

1.4. Incorporate case studies and interviews from the private sector to highlight common challenges and opportunities (case studies to be developed by IUCN).

Key considerations:

These guidelines should be consistent with the NbS definition, the NbS standards and the mitigation hierarchy, covering the whole suite of potential uses of NbS under companies' net-zero strategies:

Nature-based Solutions for CC following the mitigation hierarchy <sup>1</sup>		
Within the value chain	Beyond the value chain	
Carbon abatement	At net-zero	Beyond value chain
Based on near- and long-term science-based targets to reduce and remove value chain emissions via NbS	Once solid <u>long-term</u> science-based targets and strategies to achieve net-zero are established, companies could use NbS to neutralize any residual emissions through carbon removals.	In the near term, prioritize securing and enhancing carbon sinks (terrestrial, coastal and marine, etc.) to avoid the emissions that arise from their degradation.

- Note that regarding neutralization, several criteria make carbon removals 'high quality and high integrity'. The guidelines will add value by providing direction on the practical aspects that are intrinsically connected to the essence of NbS implementation.
- Although case studies will be developed by IUCN, the consultant will provide advice on the structure and best way to integrate the cases studies into the guidelines.
- The guidelines will comply with IUCN's [Style Manual](#) for ISBN publications, particularly for supporting matter.

2. To develop summaries of the guidelines in the form of 2 PowerPoint presentations and 2 briefs, both designed and laid out

All written pieces under this consultancy will undergo feedback and input rounds with the IUCN Secretariat and an advisory group formed by IUCN commission members and other partners. The final version of the documents will be published as IUCN's.
