Please DO NOT email the password before the deadline for Proposal submission.

4.3. *Eligibility*

Not applicable.

4.4. *Technical Proposal*

The technical proposal must address each of the criteria stated below explicitly and separately, quoting the relevant criteria reference number (left-hand column).

Proposals in any other format will significantly increase the time it takes to evaluate, and such Proposals may therefore be rejected at IUCN's discretion.

Where CVs are requested, these must be of the individuals who will carry out the work specified. The individuals you put forward may only be substituted with IUCN's approval.

IUCN will evaluate technical proposals with regards to each of the following criteria and their relative importance:

	Description	**Information to provide**	**Relative weight**
1	Quality of CV(s)	CV(s)	25%
2	Proposed approach / methodology	methodology	30%
3	Proposed resources and timetable		25%
4	Quality of references		20%
TOTAL			100%

4.5. *Financial Proposal*

4.5.1. The financial proposal must be a fixed and firm price for the provision of the goods/services stated in the RfP in their entirety.

4.5.2. *Prices include all costs*

Submitted rates and prices are deemed to include all costs, insurances, taxes (except VAT, see below), fees, expenses, liabilities, obligations, risk and other things necessary for the performance of the Terms of Reference or Specification of Requirements. IUCN will not accept charges beyond those clearly stated in the

Financial Proposal. This includes applicable withholding taxes and similar. It is your responsibility to determine whether such taxes apply to your organisation and to include them in your financial offer.

4.5.3. *Applicable Goods and Services Taxes*

Proposal rates and prices shall be exclusive of Value Added Tax.

4.5.4. *Currency of proposed rates and prices*

All rates and prices submitted by Proposers shall be in United States Dollar (USD)

Breakdown of rates and prices

Please provide a comprehensive and detailed budget according to the following format:

	Description	Quantity	Unit Price	Total Price
1				
2				
3				
4				
	TOTAL			

4.6. Additional information not requested by IUCN should not be included in your Proposal and will not be considered in the evaluation.

4.7. Your proposal must remain valid and capable of acceptance by IUCN for a period of 90 calendar days following the submission deadline.

4.8. *Withdrawals and Changes*

You may freely withdraw or change your proposal at any time prior to the submission deadline by written notice to the IUCN Contact. However, to reduce the risk of fraud, no changes or withdrawals will be accepted after the submission deadline.

5. EVALUATION OF PROPOSALS

5.1. *Completeness*

IUCN will firstly check your proposal for completeness. Incomplete proposals will not be considered further.

5.2. *Technical Evaluation*

5.2.1. *Scoring Method*

Your proposal will be assigned a score from 0 to 10 for each of the technical evaluation criteria, such that ‘0’ is low and ‘10’ is high.

5.2.2. *Minimum Quality Thresholds*

Proposals that receive a score of ‘0’ for any of the criteria will not be considered further.

5.2.3. *Technical Score*

Your score for each technical evaluation criterion will be multiplied with the respective relative weight (see Section 4.4) and these weighted scores added together to give your proposal’s overall technical score.

5.3. *Financial Evaluation and Financial Scores*

The financial evaluation will be based upon the full total price you submit. Your financial proposal will receive a score calculated by dividing the lowest financial proposal that has

passed the minimum quality thresholds (see Section 5.2.2) by the total price of your financial proposal.

Thus, for example, if your financial proposal is for a total of CHF 100 and the lowest financial proposal is CHF 80, you will receive a financial score of 80/100 = 80%

5.4. *Total Score*

Your proposal's total score will be calculated as the weighted sum of your technical score and your financial score.

The relative weights will be:

Technical: 70%
Financial: 30%

Thus, for example, if your technical score is 83% and your financial score is 77%, you will receive a total score of 83 * 70% + 77 * 30% = 58.1% + 23.1% = 81.2%.

Subject to the requirements in Sections 4 and 7, IUCN will award the contract to the bidder whose proposal achieves the highest total score.

6. EXPLANATION OF PROCUREMENT PROCEDURE

6.1. IUCN is using the Invitation Procedure for this procurement. This means that only invited bidders may submit a proposal. IUCN typically invites from four to six bidders to submit a proposal.

6.2. You are welcome to ask questions or seek clarification regarding this procurement. Please email the IUCN Contact (see Section 2), taking note of the deadline for submission of questions in Section 3.1.

6.3. All proposals must be received by the submission deadline in Section 3.1 above. Late proposals will not be considered. All proposals received by the submission deadline will be evaluated by a team of two or more evaluators in accordance with the evaluation criteria stated in in this RfP. No other criteria will be used to evaluate proposals. The contract will be awarded to the bidder whose proposal received the highest Total Score. IUCN does, however, reserve the right to cancel the procurement and not award a contract at all.

6.4. IUCN will contact the bidder with the highest-scoring proposal to finalise the contract. We will contact unsuccessful bidders after the contract has been awarded and provide detailed feedback. The timetable in Section 3.1 gives an estimate of when we expect to have completed the contract award, but this date may change depending on how long the evaluation of proposals takes.

- It is unacceptable to give or offer any gift or consideration to an employee or other representative of IUCN as a reward or inducement in relation to the awarding of a contract. Such action will give IUCN the right to exclude you from this and any future procurements, and to terminate any contract that may have been signed with you.

11. ABOUT IUCN

IUCN is a membership Union uniquely composed of both government and civil society organisations. It provides public, private and non-governmental organisations with the knowledge and tools that enable human progress, economic development, and nature conservation to take place together.

Headquartered in Switzerland, IUCN Secretariat comprises around 1,000 staff with offices in more than 50 countries.

Created in 1948, IUCN is now the world's largest and most diverse environmental network, harnessing the knowledge, resources and reach of more than 1,300 Member organisations and some 10,000 experts. It is a leading provider of conservation data, assessments, and analysis. Its broad membership enables IUCN to fill the role of incubator and trusted repository of best practices, tools, and international standards.

IUCN provides a neutral space in which diverse stakeholders including governments, NGOs, scientists, businesses, local communities, indigenous peoples organisations and others can work together to forge and implement solutions to environmental challenges and achieve sustainable development.

Working with many partners and supporters, IUCN implements a large and diverse portfolio of conservation projects worldwide. Combining the latest science with the traditional knowledge of local communities, these projects work to reverse habitat loss, restore ecosystems, and improve people's well-being.

Title of Assignment	**Develop an Arabian Mountain (Idmi) Gazelle (*Gazella gazella*) reintroduction plan for the AlUla Protected Areas Network**	
Location	**Al-Ula, Kingdom of Saudi Arabia**	
Project	**AlUla Protected Areas Network (APAN) project**	
Duration	**3 months**	
	From: 1 April 2023	**To:** 15 June 2023

Background

The International Union for the Conservation of Nature (IUCN) is the world's leading conservation membership union established in 1948 and composed of over 1,400-member organizations of both government and civil society organizations with the input of more than 18,000 experts. IUCN's mission is to influence, encourage and assist societies to conserve the integrity and diversity of nature and ensure that any use of natural resources is equitable and ecologically sustainable. Through its Regional Office for West Asia (ROWA) and related global programmes, IUCN is seeking to strengthen its presence in the Kingdom of Saudi Arabia on initiatives that align with IUCN's mission and priorities.

IUCN ROWA is currently implementing the AlUla Protected Area Network (APAN) project in AlUla, Medina Province (located in Northwest Saudi Arabia), in partnership with the Royal Commission for AlUla (RCU). The APAN project is aiming to establish and initiate a well-connected, fairly governed, and effectively managed network of protected and conserved areas that adheres to international standards and best-practices, shares lessons, brings successful regional and global approaches, and demonstrates initial success in nature conservation, restoration, and sustainable use of ecosystems and natural resources for people and biodiversity. IUCN-ROWA has established a project management unit for this project which includes staff based in IUCN-ROWA (Jordan), and in KSA.

Through this partnership project, IUCN and RCU are addressing key threats affecting AlUla's landscape and strengthening the socio-economic and environmental benefits arising from sound protection and management of AlUla's protected areas. This project sees the world's international standards and practices implemented in AlUla's protected areas, with the professional assistance of IUCN's regional and international experts. AlUla's bid to present authentic tourism experiences will be grounded in a world-class system of protected areas. Hence, this project supports the governance and management of AlUla's biodiversity and protected areas in accordance with IUCN international standards and best practices. RCU has recently designated six new protected areas: Sharaan Nature Reserve as well as the Harrat Uwayrid, Harrat Alzabin, Wadi Nakhla, AlGharameel, and Harrat Khaybar.

Scope of Work and Objectives

Under the supervision of the Senior Project Coordinator / Protected Areas, World Heritage and Business Programme – AlUla (IUCN ROWA), and in coordination and consultation with the Royal Commission for AlUla (RCU), the consultant shall provide the following services:

- Contribute to and support the implementation of **Component 3: Ecosystem rehabilitation and support for species reintroductions** for (AlUla PAN) Project, in coordination with the project coordinator and component leader.

The consultant shall ensure the delivery of the outputs and activities and shall refer to the activity description in the project document (version May 2022).

The consultant shall be responsible for the **following specific tasks** under the following relevant components:

Support the implementation of Component 3: Ecosystem rehabilitation and support for species reintroductions.

Supporting the delivery of Component 3: Ecosystem rehabilitation and support for species reintroductions

Outcome: Enhanced habitat rehabilitation for key ecosystems in important areas, including connectivity zones, using scientifically based native species reintroduction approaches*.*

Under Output 3.1: *Optimal sites for habitat rehabilitation and species reintroductions are defined.*

Activity 3.1.2*: Assess carrying capacity to ensure feasibility of the Idmi Gazelle habitat rehabilitation and reintroduction / translocation project. Role: Assess the carrying capacity for the Idmi Gazelle habitat rehabilitation and reintroduction / translocation for the AlUla PA network – at the wider landscape level, with the support of and under the supervision of the biodiversity team leader, and in collaboration with the focal person designated by RCU. The carrying capacity study should aim to cover the following aspects:*

- The Idmi Gazelle (*Gazella gazella*) reintroduction programme will consider the carrying capacity to maintain optimal viable populations of the Idmi Gazelle. Simulation modelling will be applied to estimate the optimal population of Idmi Gazelle, by integrating variables like natural growth rate, natural mortality rate, loss due to hunting and other threats, availability of prey, habitat capacity, and other variables. The consultant shall build on the findings of the rapid biodiversity assessment and the SDM work conducted under other project components.
- RCU is undertaking a five-years rangeland carrying capacity project and an inventory of flora and fauna. The consultant should advise IUCN to ensure that this activity aligns with the existing project and any results achieved under the IUCN project will inform the longer-term rangeland carrying capacity project.

Under Output 3.2: *Wildlife reintroduction strategies and management plans are developed and implemented with operational plans.*

Activity 3.2.2*: Prepare a strategy, and an implementation and operational plan for the re-introduction / translocation of the Idmi Gazelle. Role: Design implementation and operational plans for the Idmi Gazelle with the support and under the supervision of the biodiversity team leader, and in collaboration with the focal person designated by RCU. The design of the implementation and operational plans for keystone species should aim to cover the following aspects:*

- This activity focuses on the specific implementation and operational plans to support re-introductions / translocations for the Idmi Gazelle.
- The plan would vary depending upon complexity, and may include the following:
    - Specific implementation objectives and targets. The project should be designed using an adaptive management approach.
    - Specie(s) to be released, number of individuals, location, and timeframe.

  - Risk assessment and ecological consequences of the reintroduction or translocation (biological traits of the species source area, ecological conditions in the destination area, inter-specific competition, predation, disease, habitat response, etc.).
  - Alternatives and mitigations.
  - Detailed list of actions and timeline prior to, during, and following the release.
  - Personnel roles and responsibilities for RCU staff in management, technical, scientific, community relations, media, and others.
  - Specific monitoring activities and protocols to be followed and for how long (enables measuring against objectives, assessing impacts, adjusting management, identification of new threats, monitoring behaviour of the individual animals and progress in adapting to the new ecosystem, genetic monitoring, health, and mortality monitoring).
  - Equipment needs (vehicles, air support, tracking equipment, etc.).
  - The specific means for engaging local community partners, e.g., participation on social, cultural, and economic monitoring can engender support and be used to assess attitudes towards the project.
  - Budget
  - Evaluation of the project and lessons learnt to inform future projects.
  - Means and timing of reporting and sharing information (promotes awareness, contributes to local support, body of knowledge for future work).
- It is anticipated that targeted herbivores would be initial priorities, and once habitat and herbivore rehabilitation is achieved, more complex predator reintroductions can be undertaken.

Deliverables

The consultant shall submit the following to IUCN-ROWA:

Component 3: Ecosystem rehabilitation and support for species reintroductions for (AlUla PAN) Project

Outcome: *Enhanced habitat rehabilitation for key ecosystems in important areas, including connectivity zones, using scientifically based native species reintroduction approaches.*

Under Output 3.1: *Optimal sites for habitat rehabilitation and species reintroductions are defined.*
